

Coding & Solution

Date	30 June 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Solution Summary

Field	Details
Repository Link / URL	
Programming Language(s)	TypeScript, JavaScript, HTML, CSS, Python
Framework(s) Used	React.js, Vite, Tailwind CSS
Key Features Implemented	User Authentication, Responsive Dashboard, Loan Management UI, AI Settlement Recommendation Interface, Financial Analytics Dashboard, Negotiation Letter Generator UI, Reusable Components, Protected Routes, Modern Fintech Design
Pending / Incomplete Features	Backend API integration, Database connectivity, Real AI model integration, Email verification, Advanced error handling, Deployment optimization

Setup / Run Instructions	1. Clone the repository from GitHub.2. Open project in VS Code.3. Run npm install to install dependencies.4. Run npm run dev to start development server.5. Open localhost URL in browser to access the application.
--------------------------	--

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Partial
4	Error handling is implemented for critical operations	Partial
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The project demonstrates a well-structured and modern frontend architecture with reusable components, responsive UI design, and organized code management practices. The application successfully implements core user interface functionalities for the AI-powered debt relief platform. Further enhancements can include complete backend integration, advanced AI model connectivity, improved error handling, and additional documentation for production-level deployment and scalability.
