

Scalability & Future Plan

Date	04 July 2026
Team ID	
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited dataset size for training the ML model	May affect prediction accuracy for diverse loan applications	High
2	Application currently supports only local deployment	Limits scalability and real-time public access	Medium
3	No real-time credit score API integration	Loan prediction may lack advanced financial insights	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited concurrent users in local environment	Deploy on cloud infrastructure with load balancing and auto-scaling
2	Data Storage	Uses SQLite/MySQL for storing user and loan data	Upgrade to PostgreSQL or MongoDB with cloud database services
3	Performance	Moderate response speed during high request volume	Implement caching, API optimization, and asynchronous processing
4	Security	Basic authentication and local data protection	Add OAuth, JWT token security, HTTPS, and advanced encryption mechanisms

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Cloud Deployment using AWS/Azure and CI/CD Integration	2 Months	Improves scalability, accessibility, and deployment automation
Phase 2	Real-Time Credit Score API & AI Chatbot Integration	3–4 Months	Enhances prediction accuracy and improves user interaction
Phase 3	Mobile Application & Advanced Fraud Detection System	5–6 Months	Expands platform accessibility and strengthens security measures
